DESCRIPTION

The Model 1022 is a low profile single-point load cell designed for direct mounting in low cost weighing platforms.

Its small physical size, combined with high accuracy and aluminum construction, makes this low cost load cell ideally suited for retail, bench and counting scales.

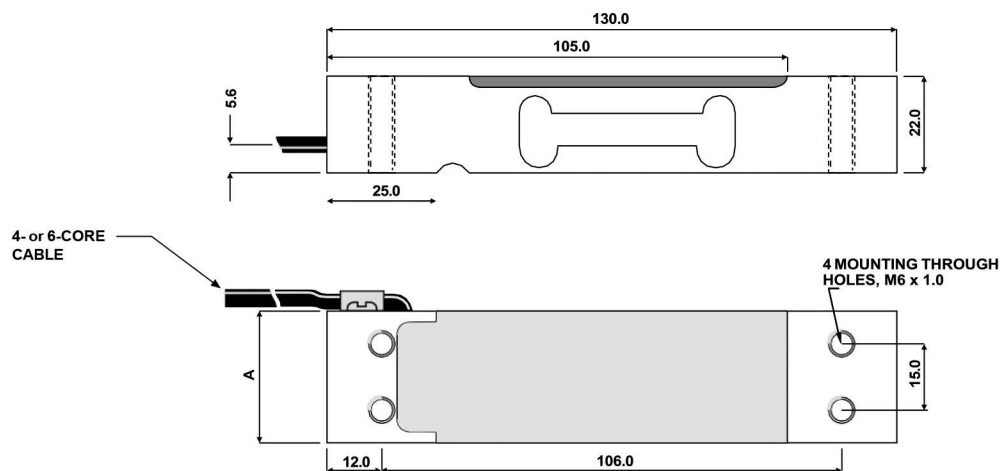

Using Model 1022 load cells simplifies scale construction, which results in significant parts and labor savings.

High impedance makes this model uniquely suitable for battery operated scales.

The Model 1022 is available in a range of capacities: 5 to 30 kg, Approved to OIML and NTEP standards (pending). Environmental protection to IP66 is provided as standard. For hazardous environments, ATEX, FM and IECEx approvals available.
